

Titanic Dataset EDA Report

1. Overview:

- Dataset contains 891 rows and 12 columns
- Missing values handled for 'Age' (filled with median) and 'Embarked' (filled with mode)

2. Key insights:

- Survival rates are higher for first-class passengers (62%) and lower for third-class customers (24%)
- Majority of passengers are aged between 20-40 years
- A positive correlation exists between fare and Survival

3. Visual Insights:
